SKILLS

Java   Selenium

Spring Boot Framework

PostgreSQL

JavaScript

ReactJs, NodeJs, ExpressJs, HTML, CSS, MongoDB

Python

Playwright, PyAutoGUI

INTERESTS

Learning new technologies

Teaching or mentoring others

EDUCATION

Bachelor's Degree in Computer Science
Presidency University

08/2018 - 05/2022 　　　　　　　　　*Bengaluru, Karnataka, India*

Senior Secondary - Class XII
Sri Chaitanya College

07/2016 - 05/2018 　　　　　　　　　　　　*Vijayawada, India*

EXPERIENCE

Junior Software Development Engineer
Signia Software Solutions

05/2023 - Present 　　　　　　　　　　　　*Hyderabad, India*
Offshore software development company in India using SDLC to deliver tailored software solutions.
Achievements/Tasks

- Developed and executed automated test scripts using Selenium, identifying and tracking bugs for web-based applications.
- Utilized Selenide for desktop application flows, collaborating with developers to resolve issues and improve stability.
- Implemented server-side logic and features with Java, optimizing existing codebases for better performance.
- Created and maintained automated test suites with Python Playwright, integrating tests into CI/CD pipelines.
- Automated desktop applications using PyAutoGUI, designing test scenarios to simulate user interactions.

Contact : Madhan Mohan - +91 76740 16209

Software Engineering Intern
10x Academy

06/2022 - 02/2023 　　　　　　　　　　　　*Hyderabad, India*
9 Months full-time program focused on DS/Algos & Full Stack Tech
Achievements/Tasks

- Built dynamic web applications using the MERN stack (MongoDB, Express.js, React, and Node.js), enhancing fullstack development skills.
- Designed and implemented RESTful APIs with Node.js and Express.js, facilitating seamless communication between client and server.
- Developed responsive front-end interfaces using React, improving user experience and application performance.
- Utilized MongoDB for database management, ensuring efficient data storage and retrieval for web applications.
